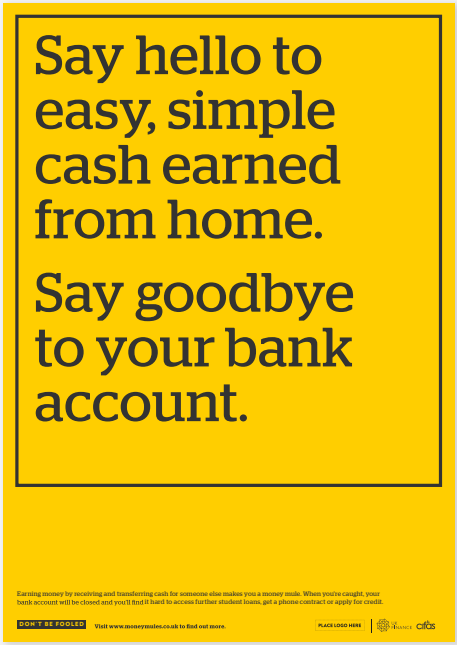
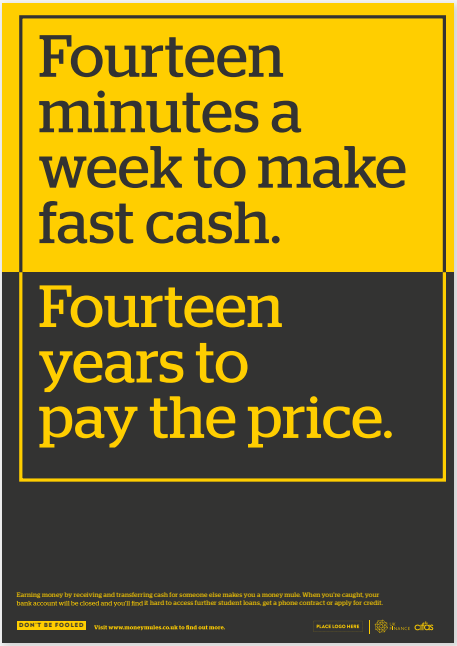
LOGO PLACEMENT GUIDELINE

Space on 'Money_Mules_Editable_Poster.idml' has been provided for partner logo at bottom right.





Logo space should look like this:

Follow this advice:

Place your logo into document and position within the guideline provided.

Right align your logo to the box so that there is equal distance between both logos and the line divider.

If possible use an all black or all yellow version of your logo.

Please use a .png file to avoid your logo having a white background (this will clash with the yellow/black background of the poster).

To create a yellow or black version of your logo place a .png of your logo into Photoshop. From the 'Layer' drop menu down select Layer Style > Colour Overlay. Double click on the colour to overlay your logo with yellow. Enter the colour values: C=0 M=20 Y=100 K=0 to obtain the correct yellow.

Be sure to remove the guideline once your logo has been correctly positioned.
